2" (50 mm)

COST-EFFECTIVE, RUSTIC PAVING STONE

Oxford paving stones, part of the *Garden* series, make it possible to create spectacular landscape designs at lesser cost because of their reduced thickness. They are available in square and rectangular combinations, to create various types of designs. These stones provide added value to your design, whatever style you choose. In reason of its lesser thickness, this paving stone is recommended for landscaping installations such as poolsides, backyards, patios and walkways.
